Professional Summary

Senior Power BI Developer and Technical Lead with 12+ years of experience delivering enterprise BI, analytics, Microsoft Fabric, Azure Data Factory, SQL Server, Data Warehousing, ETL, Data Modeling, and Power BI solutions. Proven experience working with Microsoft, financial services, retail, and consulting organizations. Strong expertise in stakeholder management, performance tuning, governance, and cloud analytics.

Technical Skills Matrix

Category	Skills
BI & Analytics	Power BI, DAX, Power Query, Paginated Reports, Power BI Service
Microsoft Fabric	OneLake, Lakehouse, Warehouse, Data Factory, Pipelines, Semantic Models, Medallion Architecture, KQL, Dataflows Gen2
Azure	ADF, Azure SQL, Azure DevOps, Azure Analysis Services
Databases	SQL Server, MySQL, PostgreSQL
ETL & Modeling	SSIS, ETL/ELT, Data Warehousing, Star Schema, Snowflake Schema
Tools	Tabular Editor, DAX Studio, Power Apps, SharePoint

Professional Experience:

ZiniosEdge Software: Senior Power BI / Microsoft Fabric Developer

Project: Microsoft – Datacenter Hardware Remediation

(Jan-25 - Present)

- Collaborated with Microsoft stakeholders to deliver enterprise-scale analytics solutions using Microsoft Fabric, enabling real-time monitoring of datacenter hardware remediation programs and operational KPIs.
- Designed and implemented Fabric Data Factory pipelines, OneLake, and Lakehouse-based Medallion Architecture (Bronze, Silver, Gold) to automate data ingestion, transformation, and governance across multiple data sources.
- Developed optimized Fabric Semantic Models, Power BI dashboards, and advanced KQL queries, providing actionable insights into remediation progress, asset health, and operational performance.
- Implemented automated refresh, monitoring, and alerting mechanisms through Fabric Pipelines, while performing data validation, troubleshooting, and performance optimization to ensure data reliability.
- Led cross-functional teams in delivering AI-driven analytics initiatives and built SharePoint- and Power Apps-based self-service solutions to improve collaboration, governance, and accessibility to business insights.

Encora Innovation Labs: Technical Lead

(May-24 to Dec-24)

- Migrated SSRS reports to Power BI and optimized dataflows.
- Resolved reporting discrepancies and managed Azure DevOps delivery activities.
- Created technical documentation and reporting standards.

Shubham Housing Finance: Senior BI Analyst

(June-23 to Dec-23)

- Designed MSSQL Data Warehouse solutions and SSIS integrations.
- Migrated Excel reporting to Power BI and delivered executive dashboards.
- Produced critical business reports and analytical insights for stakeholders.

Capgemini:

(Sep-14 to June-23)

Capgemini: Power BI Developer

Project: Kimberley-Clark – HMP Support

(March 23 - June 23)

- Developed Power BI dashboards for the Holistic Measurement Support project by integrating data from Google BigQuery and Azure DevOps, delivering actionable insights for work item and project performance analysis.
- Designed interactive reporting solutions that enhanced measurement, tracking, and decision-making capabilities, enabling stakeholders to monitor key project metrics effectively.
- Collaborated with cross-functional teams in an Agile environment, leveraging Azure DevOps for project management, backlog tracking, and timely delivery of business requirements.

Project: Olam – Data Migration (ADF)

(June 22 - March 23)

- Designed and implemented Azure Data Factory (ADF) pipelines to migrate and synchronize data between MySQL and PostgreSQL, utilizing Linked Services, Copy Activities, and transformation workflows.
- Automated end-to-end ETL processes, ensuring seamless data integration, regular synchronization, and high data quality across source and target systems.
- Performed migration validation using DiffDog, monitored pipeline performance, and successfully executed migration cutover activities, ensuring data accuracy, consistency, and minimal business disruption.

Capgemini: Power BI Developer

Project: Olam - Survey Analysis

(May 22 - March 23)

- Designed and implemented a large-scale analytics solution using SSAS Tabular Models (100M+ records / 60GB), integrating data from Azure SQL and Azure Synapse with Power BI through live connections for enterprise reporting.
- Optimized data model performance through partitioning, Azure Analysis Services, and advanced SSAS tuning techniques, while developing 4,500+ DAX measures to support complex business analytics requirements.
- Built interactive Power BI dashboards with self-service capabilities, automated dataset refresh using Azure Data Factory, and collaborated with stakeholders in an Agile environment to deliver scalable analytics solutions.

Capgemini: Power BI Developer
Project: Olam - Incident Management

(Jan 22 - April 22)

- Developed and optimized SSIS-based ETL solutions to automate weekly data ingestion from Excel to SQL Server, improving data integration efficiency and overall system performance through query tuning and indexing.
- Built 9 Power BI dashboards using DirectQuery, Data Modeling, and Row-Level Security (RLS), delivering secure, scalable, and high-performance analytics solutions for Incident Management reporting.
- Leveraged Power Query, Power Pivot, and advanced DAX techniques to transform complex datasets into interactive dashboards, enabling data-driven decision-making and enhanced stakeholder visibility into operational KPIs.

Capgemini: Power BI Developer
In-house: Operations Management

(Apr 19 - Jan 22)

- Designed and delivered enterprise Power BI dashboards and applications for Workforce Management, HR, Talent Acquisition, and Operations teams, providing insights into resource utilization, headcount, revenue forecasting, and workforce planning.
- Automated reporting and ETL processes using Power BI, Excel, and SharePoint, reducing manual report preparation effort by 90% and improving reporting efficiency.
- Led a team of five developers/analysts, enabled self-service analytics through Tabular Editor perspectives, and conducted end-user training to drive adoption and effective use of BI solutions.

Capgemini: Power BI/SQL

Project: Employee Engagement, Client: PricewaterhouseCoopers

(March-16 to Apr-19)

- Developed Power BI reports and advanced DAX calculations for PwC Employee Engagement analytics.
- Performed data validation, reporting automation, and client-facing analytical presentations.

Capgemini: Market Research

Project: HR Benchmarking, Client: PricewaterhouseCoopers

(Sep-14 to Feb-16)

- Developed workforce benchmarking metrics and performed trend and anomaly analysis for PwC clients.

IndiGo: InterGlobe Aviation – Grievance Consultant/ MIS

(May-11 to Sep-14)

- Generated MIS reports and maintained operational reporting processes.
- Managed customer grievance data and coordinated with business teams.

Education

- PG Diploma in Data Science – IIIT Bangalore
- MBA (Finance) – Annamalai University
- B.Com – Jiwaji University
